

HOW TO MAKE A MONSTER

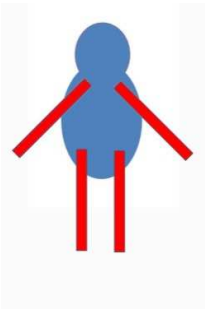

You will need: coloured card, scissors, glue, googly eyes, tissue paper, crayons or pens, tissue paper, wool.

First create the head and body: on some coloured card draw an oval body with a smaller round head, and cut this out as one piece.

You can use the template on page 2 as a guide.

Then cut out arms and legs – simple straight pieces will be fine, as you are going to be decorating them later. The strips on the edges of the template are the right size.

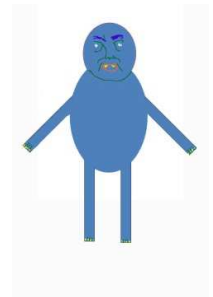

Glue them into position.

Turn the monster over and draw a face, as scary as possible.

Draw fingers and toes with sharp claws on the arms and legs.

Add googly eyes.

If you are using glue, you might need to hold them in place for a while to make sure they stay on

Decorate your monster with crayons, coloured pens, strips of tissue paper and pieces of wool.

You might want to add some fangs: stick little triangles of card on your monster's mouth.
